RE: In the Matter of Request for Review by Fulton Telephone Company, Inc. of Decision of Universal Service Administrative Company
CC Docket No. 96-45

Dear Sir or Madam:

I represent Fulton Telephone Company, Inc. ("Fulton") of Fulton, Mississippi. Pursuant to 47 C.F.R. § 54.716, please consider this letter Fulton's formal appeal and request for review of action taken by the High Cost and Low Income Division of the Universal Service Administrative Company ("USAC"). Specifically, Fulton seeks review of one finding of a follow-up audit of Fulton for Study Area Code 280455 conducted on behalf of the USAC Internal Audit Division and the Federal Communications Commission Office of Inspector General for the period July 1, 2006 through June 30, 2007. This appeal regards finding number two in the audit entitled "HC-2009-FL070-F02: Improper Methodology used in Affiliate Pricing of B&C Services."

The follow-up audit, performed by KPMG LLP ("KPMG" or "the auditors"), alleges that improper methodology was used in affiliate pricing of billing and collection services and carrier access billing systems. The auditors allege that NexBand Communications, Inc. ("NexBand"), which provides services to Fulton, is an affiliate of Fulton. KPMG states that an affiliate must use a fully distributed cost methodology to determine its charges for billing and collection services and carrier access billing systems. Fulton did not use a fully distributed cost methodology in 2004 and 2005 because NexBand is not an affiliate of Fulton. USAC and its auditors allege that this resulted in Universal Service Fund disbursements being \$14,137.00 higher than if a fully distributed cost methodology was used. Additionally, the audit questioned the reasonableness of the billing service costs charged by NexBand to Fulton. Please see the attached correspondence from USAC which includes a copy of the follow-up audit of Fulton.

Fulton disputes KPMG's claim that NexBand is an affiliate of Fulton. Pursuant to 47 C.F.R. § 32.27(c)(2), "when services are purchased from or transferred from an affiliate to a carrier, the lower of fair market value and fully distributed cost establishes a ceiling, above which the transaction cannot be recorded. . . ." Fulton does not dispute that services purchased from an affiliate must be recorded at fully distributed cost, rather Fulton contends that NexBand does not meet the plain meaning of the definition of an "affiliate" as defined in 47 U.S.C. 153(2) and 47 C.F.R. § 153 (1) which state that "[t]he term "affiliate" means a person that (directly or indirectly) owns or controls, is owned or controlled by, or is under common ownership or control with, another person." "For purposes of this paragraph, the term "own" means to own an equity interest (or the equivalent thereof) of more than 10 percent." 47 U.S.C. 153(2); 47 C.F.R. § 153 (1). NexBand is not an affiliate of Fulton because the owners of NexBand do not in any way own or control Fulton. Also, the audit cites 47 C.F.R. § 32.27(c)(3), which states that "[a]ll services received by a carrier from its affiliates(s) that exist solely to provide to members of the carrier's corporate family shall be recorded at fully distributed costs." Fulton contends that NexBand does not meet the definition of an affiliate, so §32.27(c)(3) does not apply. However, even if NexBand was considered an affiliate, it provided services to a company other than those in Fulton's corporate family, so this particular provision requiring the use of fully distributed costs also does not apply.

Fulton is fully owned by Fail, Inc., which is a wholly owned subsidiary of Fail Telecommunication Corporation. Fail Telecommunication Corporation is owned by Charles Fail and Dorothea Fail. NexBand is owned by Donna Alexander and Cy Fail, the son and daughter of Charles and Dorothea Fail. The auditors argue in their report that NexBand's services to Fulton should be evaluated under affiliate transaction rules "due to the close business and familial relationships between the owners of Fail, Inc. and NexBand. More specifically, the owner of NexBand is an employee of [Fail Inc.] and is also the daughter of the owner of Fail Telecommunications, Inc. [sic]."

While it is true that the owners of NexBand are related to the owners of Fail, Inc. and work for Fail, Inc., such a relationship does not meet the plain meaning of the definition of an affiliate because the owners of NexBand do not in any way directly or indirectly own or control Fail, Inc., Fulton, or Fail Telecommunication Corporation. Charles and Dorothea Fail have complete, ultimate, and exclusive control of Fail, Inc. and Fulton.

Donna Alexander and Cy Fail are merely employees of Fail, Inc., and have no voice or control over its management activities either directly or indirectly. Donna Alexander and Cy Fail clearly do not meet the definition of "own" or "control." The only way to own or control a company is by owning shares of stock in that company. Neither Donna nor Cy owns any shares of stock in Fail, Inc., Fulton, or Fail Telecommunication Corporation, so they clearly do not fall within the definition of "own" in the statute, which requires owning an equity interest of more than ten percent.

NexBand fails to meet the definition of "affiliate" because NexBand is owned by Donna Alexander and Cy Fail whereas Fulton, Fail Telecommunication Corporation and Fail, Inc. are owned by Charles and Dorothea Fail. Further, NexBand did not exist "solely to provide services to members of the carrier's corporate family" as alleged by the audit. During the period of this audit, NexBand also provided services to a telephone company that was wholly unrelated to Fulton and its corporate family. Therefore, 47 C.F.R. §32.27(c)(3), which would require Fulton to use a fully distributed cost methodology, does not apply.

NexBand may not be considered an affiliate simply because Donna Alexander and Cy Fail are employed by and related to the owners of Fail, Inc. KPMG's allegations of "close business and familial relationships" between the owners of Fail, Inc. and NexBand in no way cause NexBand to meet the plain meaning of the definition of "affiliate." The auditors are not allowed to use their own interpretation of affiliate; rather, they must follow the clearly stated terms set out in the definition in the statute. When interpreting the meaning of statutes, the United States Supreme Court has held that one must "begin with the familiar canon of statutory construction that the starting point for interpreting a statute is the language of the statute itself. Absent a clearly expressed legislative intention to the contrary, that language must ordinarily be regarded as conclusive." *Consumer Prod. Safety Comm'n v. GTE Sylvania*, 447 U.S. 102, 109 (1980). Based on the plain meaning of the definition of affiliate Fulton and NexBand are not "affiliates." Accordingly, USAC is not entitled to recover \$14,137.00 that they allege Fulton owes.

Additionally, even if a fully distributed cost methodology did apply to the billing and collection charges from NexBand to Fulton, the costs paid by Fulton were reasonably in range with billing and collection costs of other similarly situated companies. Fulton obtained a comprehensive analysis of the cost of end user customer billing per access line and carrier access

billing per access line from John Staurulakis, Inc. ("JSI"), a nationally renowned telecommunications consulting company. The data from JSI showed clearly that Fulton's payments of \$3.00 per access line for NexBand's end user customer billing and \$2.55 per access line for NexBand's carrier access billing systems were in the same range as prices paid by similarly situated telephone companies which were included in JSI's analysis. Please see attached for a copy of the analysis by JSI.

The audit alleges that Fulton should pay \$1.50 for customer billing and \$1.28 per for carrier access billing based on what the auditors call a "comparable contract" that they use as an example. These amounts are drastically less than the amounts supported by JSI's analysis. As shown by JSI's analysis, the average amount paid for per access line customer billing by similarly situated companies was \$3.29, and the average amount paid per access line by similarly situated companies for carrier access billing was \$2.05. NexBand's charges of \$3.00 and \$2.55 were reasonable and KPMG's suggested billing amounts are not an accurate estimation of the cost of such services. Additionally, the auditors were not aware of the billing features provided by NexBand. Such knowledge is necessary to obtain an accurate price for billing services. Also, the auditor's single contract was based on information from one particular company, whereas JSI's study was based on multiple similarly situated companies. The billing and collection costs paid by Fulton were reasonable based on amounts paid by similarly situated companies and based on the billing features received.

NexBand is not an affiliate of Fulton according to the plain meaning of "affiliate" as defined in the United States Code and the Code of Federal Regulations, and therefore Fulton is not required to use a fully distributed cost methodology and is not required to repay USAC. Further, NexBand provided service to a company wholly unrelated to Fulton or its corporate family, so C.F.R. §32.27(c)(3) does not apply even if NexBand met the definition of an affiliate. Additionally, the costs charged by NexBand to Fulton are reasonable and supported by JSI's study of billing and collection costs paid by similarly situated companies. The costs argued by KPMG are not a realistic estimate of the costs charged to Fulton, nor was the sole "comparable contract" used by KPMG accurate due to KPMG's lack of knowledge of the billing features provided by NexBand.

I look forward to your response to this matter. You may contact me at the address contained herein or at my email address, wellis@youngwilliams.com. Should you have any questions, please do not hesitate to contact me.

Sincerely yours,

Sean Wesley Ellis

RE: Results of the Follow-Up Audit to the 2007-2008 Federal Communications
Commission (FCC) Office of the Inspector General (OIG) Audit

Dear Beneficiary:

Enclosed are the finalized report from, and the USAC High Cost Management Response to, the follow-up audit to your FCC OIG audit. Included in the High Cost Management Response may be directives required for the closure of audit findings and/or comments. Please complete any such follow-up measures and provide documentation of corrective actions to USAC High Cost within 60 days of receipt of this letter, if applicable.

As is the case with any administrative decision made by USAC, you have the right to appeal findings and/or comments within the audit and High Cost Management Response. You may appeal to USAC or the FCC, and the appeal must be filed within 60 days of receipt of this letter. Additional information about the appeals process may be found at <http://www.usac.org/hc/about/filing-appeals.aspx>.

If you have any questions, please contact the High Cost Program at 202-776-0200 or hcaudits@usac.org. Please direct all High Cost audit correspondence to either the e-mail address above or:

EXECUTIVE SUMMARY

July 27, 2010

Mr. Wayne Scott, Vice President – Internal Audit Division
Universal Service Administrative Company
2000 L Street, N.W., Suite 200
Washington, DC 20036

Dear Mr. Scott:

This report presents the results of our work conducted to address the performance audit objectives relative to the Fulton Telephone Company, Study Area Code ("SAC") No.280455, ("FTC" or "Beneficiary") for disbursements of \$887,664, made from the Universal Service Fund ("USF") during the twelve-month period ended June 30, 2007. Our work was performed during the period from April 21, 2010, to July 27, 2010, and our results are as of July 27, 2010.

We conducted this performance audit in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives.

The objective of this performance audit was to evaluate the Beneficiary's compliance with the applicable requirements of 47 C.F.R. Part 54, Subparts C, D, and K, Part 36, Subpart F, and Part 32, Subpart B, of the Federal Communications Commission's ("FCC") Rules as well as FCC Orders governing Universal Service Support for the High Cost Program ("HCP") relative to disbursements of \$887,664, made from the USF during the twelve-month period ended June 30, 2007.

As our report further describes, KPMG identified the following as a result of the work performed:

1. **HC-2009-FL070-F01: Inaccurate Centralized Cost Allocations** - Centralized cost allocations (Management Fees) charged by the Operating Company to the Beneficiary totaling \$2,347,940 per year in 2004 and 2005 were improperly computed; resulting in USF disbursements being \$385,312 higher than they would have been had amounts been reported properly.
2. **HC-2009-FL070-F02: Improper Methodology used in Affiliate Pricing of Billing and Collection Services** -The Beneficiary's affiliate did not use a fully distributed cost methodology to determine its charges to the Beneficiary for Billing and Collection services in 2004 and 2005; resulting in USF disbursements being \$14,137 higher than they would have been had amounts been reported properly.
3. **HC-2009-FL070-F03: Non-Allocation of Property Taxes** - The Beneficiary did not allocate Property Taxes related to General Support Facilities used in the conduct of non-regulated

activities in 2004 and 2005; resulting in USF disbursements being \$1,254 higher than they would have been had amounts been reported properly.

4. **HC-2009-FL070-F04: Inaccurate Part 64 Cost Study Adjustments** - The Beneficiary did not record the income tax impacts of Part 64 Cost Study expense adjustments when reporting the respective regulated expense amounts on the USF Forms; resulting in USF disbursements being \$3,092 lower than they would have been had amounts been reported properly.
5. **HC-2009-FL070-F05: Inaccurate Income Tax Expenses** - The Beneficiary's Federal and State Income Tax expense was overstated in 2004 by \$8,568 and understated in 2005 by \$2,195; resulting in USF disbursements being \$1,056 higher than they would have been had amounts been reported properly.

Based on the above results, we estimate that disbursements made to the Beneficiary from the USF for the HCP for the twelve-month period ended June 30, 2007 were \$399,115 higher¹ than they would have been had amounts been reported properly.

In addition, we also noted other matters that we have reported to the management of the Beneficiary in a separate letter dated July 27, 2010.

This performance audit did not constitute an audit of financial statements in accordance with *Government Auditing Standards*. KPMG was not engaged to, and did not render an opinion on the Beneficiary's internal controls over financial reporting or over financial management systems (for purposes of OMB's Circular No. A-127, *Financial Management Systems*, July 23, 1993, as revised). KPMG cautions that projecting the results of our evaluation to future periods is subject to the risks that controls may become inadequate because of changes in conditions or because compliance with controls may deteriorate.

Sincerely,

KPMG LLP

¹ The combined estimated monetary impacts of the findings may not equal the sum of individual findings to the extent that individual findings indirectly impact other findings. For example, certain findings may impact the categorization of certain asset types and/or modify apportionment factors that apply to other individual findings when considered in combination. The individual impact amounts discussed above consider only the direct impact of the noted finding.

USAC	Universal Service Administrative Company

BACKGROUND

Program Overview

USAC is an independent not-for-profit corporation that operates under the direction of the FCC pursuant to 47 C.F.R. Part 54. The purpose of USAC is to administer the USF through four support mechanisms: High Cost; Low Income; Rural Health Care; and Schools and Libraries. These four support mechanisms ensure that all people regardless of location or income level have affordable access to telecommunications and information services. USAC is the neutral administrator of the USF and may not make policy, interpret regulations or advocate regarding any matter of universal service policy.

The High Cost Support Mechanism, also known as the HCP, ensures that consumers in all regions of the nation have access to and pay rates for telecommunications services that are reasonably comparable to those services provided and rates paid in urban areas, regardless of location or economic strata. Thus, the HCP provides support for telecommunications companies (Beneficiaries) that offer services to consumers in less-populated areas. The HCP consists of the following support mechanisms:

1. HCL: HCL support is available for rural companies operating in service areas where the cost to provide service exceeds 115% of the national average cost per line. HCL support includes the following two sub-components:
 - a. SNA: SNA support is available for carriers that make significant investment in rural infrastructure in years when HCL support is capped and is intended to provide carriers with additional incentives to invest in their networks.
 - b. SVS: SVS support is available to rural carriers that acquire high cost exchanges and make substantial post-transaction investments to enhance network infrastructure.
2. HCM: HCM support is available to carriers serving wire centers in certain states where the forward-looking costs to provide service exceed the national benchmark.
3. LSS: LSS is available to rural incumbent carriers serving 50,000 or fewer lines and is designed to help carriers recoup some of the high fixed switching costs of providing service to fewer customers.
4. ICLS: ICLS is available to rate-of-return incumbent carriers and competitive carriers, and is designed to help carriers offset interstate access charges and to permit each rate-of-return carrier to recover its common line revenue requirement, while ensuring that its SLCs remain affordable to its customers.
5. IAS: IAS is available to price-cap incumbent carriers and competitive carriers, and is designed to offset interstate access charges for price cap carriers.

USAC engaged KPMG to conduct a performance audit relating to the Beneficiary's compliance with the applicable requirements of 47 C.F.R. Part 54, Subparts C, D, and K, Part 36, Subpart F, and Part 32, Subpart B, of the FCC's Rules as well as FCC Orders governing Universal Service Support for the HCP relative to disbursements of \$887,664, made from the USF during the twelve-month period ended June 30, 2007.

Beneficiary Overview

Fulton Telephone Company, Inc. (SAC No. 280455), the subject of this performance audit, is an ILEC, Rural, Cost Company with competition in its study area and received LSS, ICLS, SNA and HCL support for the twelve-month period ended June 30, 2007. The Beneficiary is located in Fulton, Mississippi and has its corporate offices in Bay Springs, Mississippi. The Beneficiary is subject to regulation by the MSPC with respect to intrastate services and the FCC with respect to interstate services.

The Beneficiary is 100% owned by Fail Inc. (the "Operating Company"), a wholly owned subsidiary of the Fail Telecommunications Inc. (the "Parent"). The Parent is controlled by the Fail family. The Beneficiary's Affiliates, also owned by the Parent, include Chickamauga Telephone Corporation, Mound Bayou Telephone Corporation, both ILECs and GulfPines Communications, a CLEC.

In addition to these affiliates, the Beneficiary is also related to NexBand, a provider of non-regulated services to the Beneficiary's customers. NexBand also provides B&C services to the Beneficiary and its affiliates and is owned by a member of the Fail family. Accordingly, transactions between the Beneficiary and its affiliates were reviewed as part of this performance audit.

The following table illustrates the High Cost support disbursed by USAC to the Beneficiary for each quarter during the twelve-month period ended June 30, 2007 by fund type:

Quarter Ended	Total Disbursements	HCL	LSS	ICLS	SNA
September 30, 2006	\$176,517	\$123,972	\$111,600	\$(59,055)	\$ -
December 31, 2006	176,865	124,320	111,600	(59,055)	-
March 31, 2007	267,000	78,036	76,569	92,880	19,515
June 30, 2007	267,282	128,886	15,657	92,880	29,859
Total	\$887,664	\$455,214	\$315,426	\$67,650	\$49,374

Source: USAC

Performance Audit Approach

The High Cost support received by the Beneficiary during the twelve-month period ended June 30, 2007, was based on the following annual financial and operational data submitted by the Beneficiary to NECA and USAC:

- 2005-1 and 2006-2 HCL Forms, based on calendar year 2004 and 2005 data, respectively, as well as subsequent updated dash filings submitted via the 2005-2 and 2006-3 HCL Forms based on data for the twelve-month periods ended March 31, 2006 and June 30, 2007, respectively.
- 2005 LSS Form, based on calendar year 2005 data.
- 2004 FCC Form 509, based on calendar year 2004 data.
- Written notice of eligibility for SNA based on calendar years 2001 and 2002.

These Forms capture the totals of certain pre-designated G/L Accounts including all asset accounts that make up TPIS as well as certain deferred liabilities and operating expenses, subject to the allocation between regulated and non-regulated activities (Part 64 Cost Allocations), the separation between interstate and intrastate operations (Part 36 Cost Separations) and the separation between access and non-access elements (Part 69 Cost Separations). In addition, the Beneficiary is required to submit certain annual investment data, including the categorization of COE and C&WF on the USF Forms.

Prior to this performance audit, USAC had engaged KPMG to perform a compliance attestation examination of the Beneficiary's compliance with the applicable requirements of 47 C.F.R. Part 54, Subparts C, D, and K, Part 36, Subpart F, and Part 32, Subpart B, of the FCC's Rules as well as FCC Orders governing Universal Service Support for the HCP relative to disbursements of \$887,664, made

from the USF during the twelve-month period ended June 30, 2007. KPMG noted during the planning phase of the compliance attestation engagement that the Beneficiary lacked supporting documentation for the following:

- Asset balances reported on USF Forms
- Affiliate Transactions between the Beneficiary and its non-regulated affiliates

In connection with the compliance attestation engagement, KPMG had inspected the Assets and Affiliate Transactions and noted that support for a significant portion of the information subject to examination was not available. Based on this circumstance, KPMG was unable to perform test procedures related to various assets and expenses, involving affiliate transactions, reported on the USF Forms and withdrew from the engagement, as it was unable to ascertain management's compliance with the applicable requirements of 47 C.F.R. Part 54, Subparts C, D, and K, Part 36, Subpart F, and Part 32, Subpart B, of the FCC's Rules as well as FCC Orders governing USF for the HCP with respect to disbursements made from the USF for the twelve-month period ended June 30, 2007.

For this performance audit, KPMG conducted test procedures relative to assets and affiliate transactions as noted below:

CPRs / Assets

The Beneficiary was able to provide CPR data for COE assets but did not maintain CPRs for GSF and C&WF assets. As underlying documentation supporting assets (CPRs) was not available for GSF and C&WF assets, KPMG performed alternative procedures based on G/L details of these asset accounts between 1999 and 2005, along with COE balances reflected on December 31, 2005 CPRs, to assess the reasonableness and accuracy of the assets recorded as of December 31, 2005.

KPMG utilized the asset account history (1999 – 2005) to make a sample selection. The asset account history covered 50% (GSF – 34%, COE – 100% and C&WF – 14%) of Gross Asset balances. KPMG selected a statistical sample of GSF, COE and C&WF assets in service during the performance audit period that were less than 100% depreciated. KPMG's procedures to evaluate the Beneficiary's asset balances as of December 31, 2004 and 2005 included an evaluation of the Beneficiary's methodology to support the asset account balances and categorizations, physical inspection of Beneficiary assets and statistical sample testing of the actual/estimated historical costs of the assets in service during the performance audit period. In order to determine the reasonableness of the asset cost estimates on the CPRs, the Beneficiary provided third-party invoices where available, work orders, and other supporting documentation.

Affiliate Transactions

Significant affiliate transactions were identified per review of the audited financial statements and through inquiry of the Beneficiary. Affiliate transactions included services provided by the Beneficiary to its affiliates as well as services received from affiliate companies.

KPMG's procedures to evaluate the reasonableness of the affiliate transactions included sample testing of the affiliate transactions by reviewing the intercompany receivables and payables accounts recorded in the Beneficiary's trial balance and testing of support behind recorded transactions.

OBJECTIVES, SCOPE AND METHODOLOGY

Objectives

The objective of this performance audit was to evaluate the Beneficiary's compliance with the applicable requirements of 47 C.F.R. Part 54, Subparts C, D, and K, Part 36, Subpart F, and Part 32, Subpart B, of the FCC's Rules as well as FCC Orders governing Universal Service Support for the HCP relative to disbursements of \$887,664, made from the USF during the twelve-month period ended June 30, 2007.

Scope

The scope of this performance audit includes, but is not limited to, reviewing USF Forms or other correspondence and supporting documentation provided by the Beneficiary, assessing the methodology used to prepare or support the USF Forms or other correspondence, and evaluating disbursement amounts made or potentially due based on filings of USF Forms or other correspondence relative to disbursements made from the USF during the twelve-month period ended June 30, 2007. To the extent required, our procedures were extended to activities of the Beneficiary's affiliates and other related-parties to obtain sufficient information upon which to make our assessment.

KPMG identified the following areas of focus for this performance audit based upon our risk assessment:

1. Materiality Analysis
2. Assets
3. COE Categorization
4. C&WF Categorization
5. Taxes
6. Part 64 Cost Allocations
7. Related-Parties/Affiliate Transactions

Methodology

This performance audit includes procedures related to the high cost support mechanisms for which funds were received by the Beneficiary during the disbursement period July 1, 2006 through June 30, 2007. The procedures conducted during this performance audit include an analysis of the following:

1. Prior period engagements (e.g., audits, studies, etc.) that are significant within the context of the current audit objectives related to assessing risk, determining the nature, timing and extent of current audit work, and evaluating corrective actions taken to address findings and recommendations,

2. Material accounts included in the 2005-2 and 2006-3 HCL and 2005 LSS Forms, and the 2004 Form 509 selected for sample testing in the Asset² test procedures,
3. Framework and approach established by the Beneficiary to support the CPRs from 2004 and 2005,
4. Asset balances and categorization to evaluate the reasonableness of the asset valuation, underlying G/L balances of assets and asset-related accounts, and classification and categorization of assets,
5. Methodologies and procedures used to perform the COE and C&WF asset categorizations,
6. Tax expense and related asset and liability balances in specific tax accounts recorded in the G/L,
7. Part 64 Cost Allocation methodologies including the appropriateness of allocation factors, evaluation of data sources and the frequency of the updates to the cost apportionment studies,
8. Affiliate transactions to determine the appropriateness of affiliate transaction pricing and management fee allocations.

² KPMG used a stratified random sampling methodology to select 45 asset samples from the material accounts identified in the 2005-2 and 2006-3 HCL and 2005 LSS Forms, and the 2004 Form 509. For the performance audit purposes, KPMG created four strata. Stratum one consisted of 16 assets with acquisition values between \$79,026 and \$210,374, and was sampled at 100%. Stratum two consisted of 33 assets with acquisition values between \$27,115 and \$79,025, and 7 samples were selected from this stratum. Stratum three consisted of 75 assets with acquisition values between \$17,003 and \$27,114, and 5 samples were selected from this stratum. Stratum four consisted of 109 assets with acquisition values between \$0 and \$17,002, and 17 samples were selected from this stratum.

RESULTS

KPMG's performance audit results include a listing of findings, recommendations and management's responses with respect to the Beneficiary's compliance with FCC requirements, and an estimate of the monetary impact of such findings relative to 47 C.F.R. Part 54, Subparts C, D, and K, Part 36, Subpart F, and Part 32, Subpart B, applicable to the disbursements made from the USF during the twelve-month period ended June 30, 2007. KPMG also noted other matters that we have reported to the management of the Beneficiary in a separate letter dated July 27, 2010.

Findings, Recommendations and Beneficiary Responses

KPMG's performance audit procedures identified five significant findings. The findings along with the criteria, cause, effect, recommendation, and the Beneficiary response are as follows:

1. HC-2009-FL070-F01: Inaccurate Centralized Cost Allocations

Condition

Centralized cost allocations (Management Fees) charged by the Operating Company to the Beneficiary totaling \$2,347,940 per year in 2004 and 2005 were improperly computed. The Operating Company utilized a fully distributed cost methodology to arrive at estimated centralized costs to be allocated to the Beneficiary and its affiliates, based on the Operating Company's 2003 financial statements.

- The Operating Company included Bad Debts of \$511,398 in centralized costs which were allocated to the Beneficiary. These allocations were made in error as the Parent's bad debts should not have been included as part of the fully distributed cost allocations to Fulton.
- The Operating Company included taxes of \$665,321 in centralized costs which were allocated to the Beneficiary; however, the Beneficiary had already recorded a tax liability in its accounting records based on its annual operating results.
- The Operating Company utilized a 12% Rate of Return on the net assets in determining fully distributed cost methodology instead of using the FCC's authorized rate of 11.25%.
- The Operating Company determined Cash Working Capital³ based on total operating expenses required for 30 days instead of 15 days as prescribed by the FCC.
- The estimated centralized costs were not trued-up for 2004's and 2005's actual results.

³ Calculation of cash working capital is guided by - 47 C.F.R. Part 65, Subpart G which prescribes a specific methodology in calculating working capital based on full lead-lag study. NECA suggests a simplified calculation where Total Amount for Allowances is multiplied by a factor of 0.041096.

Criteria

According to 47 C.F.R. § 32.27(c)(2), "When services are purchased from or transferred from an affiliate to a carrier, the lower of fair market value and fully distributed cost establishes a ceiling, above which the transaction cannot be recorded. Carriers may record the transaction at an amount equal to or less than the ceiling, so long as that action complies with the Communications Act of 1934, as amended, Commission rules and orders, and is not otherwise anti-competitive."

In addition, according to 47 C.F.R. § 32.27(c)(3), "All services received by a carrier from its affiliate(s) that exist solely to provide to members of the carrier's corporate family shall be recorded at fully distributed cost."

Further, according to 47 C.F.R. § 32.27(e), "Income taxes shall be allocated among the regulated activities of the carrier, its non-regulated divisions, and members of an affiliated group. Under circumstances in which income taxes are determined on a consolidated basis by the carrier and other members of the affiliated group, the income tax expense to be recorded by the carrier shall be the same as would result if determined for the carrier separately for all time periods, except that the tax effect of carry-back and carry-forward operating losses, investment tax credits, or other tax credits generated by operations of the carrier shall be recorded by the carrier during the period in which applied in settlement of the taxes otherwise attributable to any member, or combination of members, of the affiliated group."

Cause

The Beneficiary incorrectly included certain Operating Company expenses in the calculation of centralized costs. Additionally, the Beneficiary used an incorrect rate of return and an incorrect cash working capital factor in its calculation of centralized costs. The Beneficiary did not have adequate processes and controls in place to review the fully distributed cost components used in calculation of centralized costs or to utilize the correct rate of return and working capital factors.

Effect

The exceptions identified above have an impact on HCL, LSS and ICLS disbursements. The monetary impact of this finding relative to disbursements made from the USF for the HCP for the twelve-month period ended June 30, 2007 is estimated as follows:

- HCL disbursements calculated in the 2004 and 2005 data submissions were approximately \$201,308 higher than they would have been had amounts been reported properly.
- LSS disbursements calculated in the 2005 data submission were approximately \$34,543 higher than they would have been had amounts been reported properly.
- ICLS disbursements calculated in the 2004 data submission were approximately \$149,461 higher than they would have been had amounts been reported properly.

Recommendation The Beneficiary should enhance policies and procedures governing the determination of centralized costs using a fully distributed cost methodology in accordance with the affiliate transaction rules.

Beneficiary Response Fulton Telephone Company (Fulton) has already taken steps to implement policies and procedures to assure that its Centralized Costs are in compliance with 47 C.F.R. §32.27 Affiliate Transaction Rules.

2. HC-2009-FL070-F02: Improper Methodology used in Affiliate Pricing of B&C Services

Condition NexBand did not utilize a fully distributed cost methodology to calculate B&C charges to the Beneficiary for 2004 and 2005.

The Beneficiary incurred B&C costs of \$360,919 and \$309,475 for customer and CABS billing, respectively, in 2004 and \$328,555 and \$286,921 for customer and CABS billing, respectively, in 2005.

The Beneficiary provided KPMG with example customer bills which indicated charges of \$3.00 for customer B&C service and \$2.55 for CABS B&C services.

KPMG was unable to obtain supporting documentation from the Beneficiary for these costs. Accordingly, to assess the reasonableness of the B&C costs, KPMG obtained a comparable contract for a beneficiary with a similar B&C arrangement with its affiliate. In this instance the affiliate charged \$1.50 per customer bill under a fully distributed cost methodology, representing 50% of amount charged by NexBand to the Beneficiary.

We were unable to identify a similar contract for CABS billing. Accordingly, we utilized the ratio noted above to create an estimated fully distributed cost amount for CABS billing. Using the 50% factor, NexBand CABS billing would be approximately \$1.28 per invoice.

Criteria According to 47 C.F.R. § 32.27(c)(2), "When services are purchased from or transferred from an affiliate to a carrier, the lower of fair market value and fully distributed cost establishes a ceiling, above which the transaction cannot be recorded. Carriers may record the transaction at an amount equal to or less than the ceiling, so long as that action complies with the Communications Act of 1934, as amended, Commission rules and orders, and is not otherwise anti-competitive."

In addition, according to 47 C.F.R. § 32.27(c)(3), "All services received by a carrier from its affiliate(s) that exist solely to provide to members of the carrier's corporate family shall be recorded at fully distributed cost."

Cause The Beneficiary's Affiliate did not utilize a fully distributed cost methodology in determining B&C costs charged to and recorded by the

Beneficiary. In addition, the Beneficiary did not have adequate processes and controls in place to review the fully distributed cost components used in calculation of B&C charges.

Effect

The exception identified above has an impact on LSS and ICLS disbursements. The monetary impact of this finding relative to disbursements made from the USF for the HCP for the twelve-month period ended June 30, 2007 is estimated as follows:

- LSS disbursements calculated in the 2005 data submission were approximately \$5,913 higher than they would have been had amounts been reported properly.
- ICLS disbursements calculated in the 2004 data submission were approximately \$8,224 higher than they would have been had amounts been reported properly.

Recommendation

The Beneficiary's affiliate should perform a comprehensive analysis to determine the fully distributed cost of providing customer and CABS B&C services to the Beneficiary, in accordance with the affiliate transaction rules.

Beneficiary Response

Fulton does not agree with KPMG's assertion that there is an affiliate arrangement between Fulton and the billing company, NexBand. As defined by the Communications Act of 1934 Sec. 3. [47 U.S.C. 153(1)], the term "affiliate" means a person that (directly or indirectly) owns or controls, is owned or controlled by, or is under common ownership or control with, another person. There is neither common ownership nor control between Fulton and NexBand.

The rates that Fulton is being charged by NexBand are based on historical data from a prior billing company. Therefore, Fulton does not agree with KPMG's finding that NexBand's billing charges constitute overcharges.

KPMG Response:

We believe that NexBand's B&C services to the Beneficiary should be evaluated under the affiliate transaction rules due to the close business and familial relationships between the owners of Fail Inc. (Operating Company) and NexBand. More specifically, the owner of NexBand is an employee of the Operating Company and is also the daughter of the owner of Fail Telecommunications, Inc. (Parent Company).

3. HC-2009-FL070-F03: Non-Allocation of Property Taxes

Condition

The Beneficiary did not allocate Property Taxes related to GSF assets used in the conduct of non-regulated activities in 2004 and 2005 as required. The Beneficiary allocated 3% of GSF Assets and related, Accumulated Depreciation, Depreciation Expense and General Support

Expenses to non-regulated activities but failed to allocate related Property Taxes. Property Tax balances in 2004 and 2005 were \$81,188 and \$91,712, respectively.

Criteria

According to 47 C.F.R. § 32.12(b), "The company's financial records shall be kept with sufficient particularity to show fully the facts pertaining to all entries in these accounts. The detail records shall be filed in such manner as to be readily accessible for examination by representatives of this Commission."

According to 47 C.F.R. § 32.14(c), "In the application of detailed accounting requirements contained in this part, when a regulated activity involves the common or joint use of assets and resources in the provision of regulated and non-regulated products and services, companies shall account for these activities within the accounts prescribed in this system for telephone company operations. Assets and expenses shall be subdivided in subsidiary records among amounts solely assignable to non-regulated activities, amounts solely assignable to regulated activities, and amounts related to assets used and expenses incurred jointly or in common, which will be allocated between regulated and non-regulated activities."

According to 47 C.F.R. § 64.901(a), "Carriers required to separate their regulated costs from non-regulated costs shall use the attributable cost method of cost allocation for such purpose."

According to 47 C.F.R. § 64.902(b)(iii), "When neither direct nor indirect measures of cost allocation can be found, the cost category shall be allocated based upon a general allocator computed by using the ratio of all expenses directly assigned or attributed to regulated and non-regulated activities."

Cause

The Beneficiary did not have adequate procedures and controls over the review and approval of Part 64 Cost Allocations of common or joint costs between regulated and non-regulated activities to ensure that all costs related to non-regulated activities were properly allocated.

Effect

The exception identified above has an impact on HCL, LSS and ICLS disbursements. The monetary impact of this finding relative to disbursements made from the USF for the HCP for the twelve-month period ended June 30, 2007 is estimated as follows:

- HCL disbursements calculated in the 2004 and 2005 data submissions were approximately \$718 higher than the disbursements would have been had amounts been reported properly.
- LSS disbursements calculated in the 2005 data submission were approximately \$63 higher than the disbursements would have been had amounts been reported properly.

- ICLS disbursements calculated in the 2004 data submission were approximately \$473 higher than the disbursements would have been had amounts been reported properly.

Recommendation	The Beneficiary should establish, document and implement procedures to address the preparation, review and approval processes related to the Part 64 Cost Allocations of common or joint costs. In addition, the Beneficiary should directly assign costs to regulated and non-regulated activities to the extent possible. In instances where direct assignment is not possible, the Beneficiary should perform an appropriate study for the assets and expenses to allocate common or joint costs between regulated and non-regulated activities.
Beneficiary's Response	Fulton will establish procedures for allocating corresponding Property Tax adjustments related to the Part 64 Cost Allocations of common or joint costs between regulated and non-regulated activities for compliance with 47 C.F.R. § 64.901(a) and § 64.902(b)(iii).

4. HC-2009-FL070-F04: Inaccurate Part 64 Cost Study Adjustments

Condition	The Beneficiary did not record the income tax impacts of Part 64 Cost Study expense adjustments when reporting the respective regulated expense amounts on the USF Forms as required.
Criteria	<p>According to 47 C.F.R. § 32.12(a), "The company's financial records shall be kept in accordance with generally accepted accounting principles to the extent permitted by this system of accounts."</p> <p>According to 47 C.F.R. § 32.12(b), "The company's financial records shall be kept with sufficient particularity to show fully the facts pertaining to all entries in these accounts. The detail records shall be filed in such manner as to be readily accessible for examination by representatives of this Commission."</p>
Cause	The Beneficiary did not have appropriate oversight controls in-place to identify that its part 64 Cost Study expense adjustments were not tax affected in its HCL and LSS form submissions, as required. .
Effect	<p>The exceptions noted above impact the Beneficiary's HCL, and LSS disbursements. The monetary impact of this finding relative to disbursements made from the USF for the HCP for the twelve-month period ended June 30, 2007 is estimated as follows:</p> <ul style="list-style-type: none"> • HCL disbursements calculated in the 2004 and 2005 data submissions were approximately \$2,750 lower than the disbursements would have been had amounts been reported properly.

- LSS disbursements calculated in the 2005 data submission were approximately \$342 lower than the disbursements would have been had amounts been reported properly.

Recommendation The Beneficiary should tax-affect Part 64 Cost Study expense adjustments prior to reporting on the USF Forms, using the effective income tax rate.

Beneficiary's Response Fulton's Cost Consultant, John Staurulakis, Inc. (JSI) has instituted additional procedures to comply with the need to tax-affect Part 64 Cost Study expense adjustments, reflective of effective income tax rates, prior to reporting on the USF Forms.

5. HC-2009-FL070-F05: Inaccurate Income Tax Expenses

Condition The Beneficiary's Federal and State Income Tax expense was overstated in 2004 by \$8,568 and understated in 2005 by \$2,195 in its accounting records and USF Forms.

Criteria According to 47 C.F.R. § 32.12(a), "The company's financial records shall be kept in accordance with generally accepted accounting principles to the extent permitted by this system of accounts."

According to 47 C.F.R. § 32.12(b), "The company's financial records shall be kept with sufficient particularity to show fully the facts pertaining to all entries in these accounts. The detail records shall be filed in such manner as to be readily accessible for examination by representatives of this Commission."

Cause The Beneficiary's accumulated depreciation calculated on final tax forms differed from source data for asset disposals and transfers. The accumulated depreciation amounts reflected for asset disposals and transfers on tax filings were adjusted to reflect accurate transaction amounts; however, the book balances were not adjusted to reflect the same.

Effect The exceptions identified above have an impact on HCL disbursements. The monetary impact of this finding relative to disbursements made from the USF for the HCP for the twelve-month period ended June 30, 2007 is estimated as follows:

- HCL disbursements calculated in the 2004 and 2005 data submissions were approximately \$1,056 higher than the disbursements would have been had amounts been reported properly.

Recommendation The Beneficiary should enhance processes governing calculation of income tax amounts to ensure compliance with FCC Rules and Orders.

Beneficiary Response

Fulton Telephone Company, along with their tax accountant, will implement procedures to ensure that future income tax amounts are calculated in compliance with FCC Rules and Orders.

Conclusion

KPMG's evaluation of the Beneficiary's compliance with the applicable requirements of 47 C.F.R. Part 54, Subparts C, D, and K, Part 36, Subpart F, and Part 32, Subpart B, based on revised USF Forms or other correspondence identified Part 64 Cost Study allocations, property and income taxes, and affiliate transaction findings relative to the disbursements made from the USF during the twelve-month period ended June 30, 2007. Detailed information relative to the findings is described in the Findings, Recommendations and Beneficiary Response section above.

KPMG evaluated the USF disbursements made based on earlier filings of USF Forms, as compared to those which would have been made based on the revised filings or other correspondence. The combined estimated monetary impact⁴ of these findings as follows:

Disbursement Mechanism	Monetary Impact Overpayment
HCL	\$200,332
LSS	\$40,626
ICLS	\$158,157
Total Impact	\$399,115

⁴ The combined estimated monetary impacts of the findings may not equal the sum of individual findings to the extent that individual findings indirectly impact other findings. For example, certain findings may impact the categorization of certain asset types and/or modify apportionment factors that apply to other individual findings when considered in combination. The individual impact amounts discussed above consider only the direct impact of the noted finding.
